Smoke Test Comments: - This bud was tried in several different methods to hopefully give the best overall test but we found it best when vaporized. The smoke has a slightly earthy taste which is then followed by a lovely hash taste which took me back to the early 90s when we used to smoke Colombian gold seal hash. This strain explodes like an atom bomb when ran through a water bong & has an amazing long lasting high.

FINAL COMMENTS: - We were very satisfied in every way where this strain is concerned it definitely helped with my insomnia along with moderate pain issues. The high is not a couch lock high but it is a very strong high so you could possibly work on it but in my opinion it is best for a night time smoke as it has a devastating kick which if smoked during the day could do more harm than good. Thank you airedog for growing out this amazing looking stain & I must say that this is one of the only strains that actually smell & smoke like killer hash.
