 - 6. Smoke expansion:** 9 smoke expansion in the lungs from 1-10 stable-explodes.
- Smoke Test Comments:** - We tried this strain using the TY Roor, the herbalaire and in joint form but found it most effective when vaporized. The smoke/vapor is extremely thick even when vaporized at a low temp and hits those lungs with a bang giving a mouth watering diesel taste followed by a lovely lime taste on the exhale. The high from this strain is very long lasting with a powerful head high and a total body buzz that still leaves you capable of working but has the power to knock you out if that is what you need.

FINAL COMMENTS: -As I suffer from severe panic attacks it can be hard to find a strain that does not set my panic attacks off which some high thc strains can do, that is why i love this strain it has a highish thc count(12-16%) but has not set my panic attacks of rather i have got more done whilst testing this strain than in many years that is why i also think it could have a high cbd count?. This strain can pack a punck to put you asleep but you can also smoke this strain all day in moderation and still work (also very hard to find in a high end the strain). I personally loved this strain and i will keep this strain going for some years to come. A great all round strain who could ask for more, thank you dinafem.
