**Comment** -his strain produced some very nice size compact buds with an average overall crystal content. This is a very pretty looking strain and when you first see it you are overwhelmed with the amount of pistils that have been produced which makes this a very red/rusty looking strain. The trichomes under the scope had very long stems with small 70-90micron clear/amber heads which made the trim excellent for full melt bubble hash.9/10 for bag appeal.
