FINAL COMMENTS: − Well what a great concentrate we have here!, this was the first time smoking any one hash apart from my own for a good few years and it surprised me in so many way's. The main 3 were (1) insomnia- as it had the ability to totally knock you out (2)my panic attack's- which concentrated usually agitate due to how strong they can be but with this "pollen" it kept me very level headed and did actually stop a panic attack from turning really bad! (3)appetite stimulation-my appetite is not the best but when smoking this hash I could not stop eating so if you timed your medicating right to fit in with meal times say "20 minutes before" I could actually sit down with my family for a meal which I had not done in a long time. Thank you my good friend Danni for letting me test out your superb "pollen" hash, a great all around smoke made by a Spanish hash making master! Who could ask for more?
